Experience

Software Developer Intern — AveryBit Solutions Pvt. Ltd, Indore
Role: Software Developer Intern | Aug 2025 – Present

- Developed a chatbot system for enterprise use cases under tight deadlines.
- Adopted Langflow, a no-code AI orchestration tool, to accelerate development instead of building everything manually.
- Designed conversation flows, integrated APIs, and connected the chatbot with knowledge bases.
- Applied LangChain concepts to evaluate performance and build LLM-powered applications.

Education

Indore Institute of Science and Technology (Indore, Madhya Pradesh)   Nov 2022 – Jul 2026
Course: B-Tech in Computer Science

Projects & Experience

Tijori – Mobile-Based Expense Management App   Demo Video
Role: Backend Developer | GitHub Repo | Dec 2024 – Mar 2025

- Built a mobile-friendly app that auto-tracks expenses via SMS.
- Designed REST APIs using Spring Boot for transaction, profile, goal, and analytics management.
- Integrated Firebase for OTP authentication and push notifications.
- Enabled real-time savings tracking with feedback.
- Ensured privacy by processing SMS locally.

GamingZone – E-Commerce Platform for Gaming Products   Live
Role: Full Stack Developer | GitHub Repo | Oct 2024 – Dec 2024

- Built a full-stack app with cart, product browsing, and secure Stripe checkout.
- Integrated Cloudinary for media, and microservice architecture with Gateway & Eureka.
- Used Codecentric Admin Server for monitoring.

ThinkAndSelect – Online Quiz & Learning Platform   Live
Role: Full Stack Developer | GitHub Repo | Jul 2024 – Sep 2024

- Developed quiz modes (Practice, Exam) with certificate generation.
- Integrated an online compiler supporting multiple languages.
- Added Notes and Tutorials modules.
- Backend secured with Spring Security protocols.
